THE ANSWER TO YOUR HEALTH & SAFETY REQUIREMENTS

Don't be caught out, be pro active.

“COMBINING EFFICIENCY WITH ACCURACY”

For your complete answer to Driver/Truck Record & Administration systems combined with your essential health & safety requirements.

Call the friendly team at WTL for advice to customize your own combined logbook, precheck, daily run sheet and **health & safety systems & procedures book**.

Leaders in Driver Recording & Reporting Systems

Have you covered yourself for your Driver's health & safety requirements? We can help you...

Let us help you incorporate these into your new combined logbook.

Do it
**ALL IN
ONE**

Just some of the features we can pack into your logbook:

- Pre-trip check
- Daily time/work sheets
- Your walk around inspection
- Your emergency instructions
- Your health & safety procedures
- Your incident reports
- Your contacts details

**ARE YOUR FORKLIFT
DRIVERS COVERED
AS WELL?**

"We highly recommend these books, they have made life much easier for both drivers and admin staff. The customised design gives our drivers a sense of identity."

Malcolm Payne | Director
Dynes Transport Ltd

"The team at Work Time were so easy to work with when setting our logbook up and made sure that they were able to include everything we required into the one book."

Angus Petrie | Transport Manager
NZ Express Transport

"Work Time listened to our needs & the design has greatly sped up our processes. Delivery times are fast & we thank Work Time for a totally hassle-free experience & quality end result."

Jamie Powell | Finance Manager
Tru-line Civil

"Drivers as well as Management are extremely happy with the new logbooks and their ease of use."

Mark Holland | GM Operations
TNL Group Ltd

Why are our books so good?

- ▶ Help increase your operator rating system.
- ▶ Less paperwork for everyone.
- ▶ Less books and no loose sheets for your drivers to look after, fill in or lose.
- ▶ Driver's are more accountable and responsible in all their duties.
- ▶ Daily checks reduce maintenance and the possibility of major failures & their serious consequences.
- ▶ Speed up response times for maintenance issues.
- ▶ Maintenance issues can be reported as they arise.
- ▶ Driver's can monitor and be more aware of fatigue.
- ▶ Incidents can be accurately reported at the time of the event.
